Margie Lovett-Scott, Faith Prather : Global Health Systems: Comparing Strategies for Delivering Health Systems before purchasing it in order to gage whether or not it would be worth my time, and all praised Global Health Systems: Comparing Strategies for Delivering Health Systems:

0 of 0 people found the following review helpful. Great book! Lots of great information of the global ...By nancyGreat book! Lots of great information of the global health systems. Love the class that I am taking that requires this book!0

of 0 people found the following review helpful. Five StarsBy Margaret Rory GilhoolyGreat buy! I purchased this text for 20% less than I would have at my campus bookstore.0 of 0 people found the following review helpful. Five StarsBy Anthonette FreemanLove it thank You

Written as a textbook for International health, comparative studies, global health, international affairs, health administration and public health, Global Health Systems helps students to think more deeply about how health care is organized. The friendly writing style engages the learner in understanding how global health systems are interdependent and stresses what one system can learn from the other. The book presents a variety of real life, stimulating examples of what can go wrong at the health system level and practice level with suggestions for preventing future problems. Review questions are included at the end of each chapter summarizing major points and facilitating critical thinking, problem-solving, and informed decision-making particularly when addressing health care, cost, quality, and true access. Instructor Resources: Instructor Manual, PowerPoint Slides, Test Bank
