George Lueddeke PhD : Global Population Health and Well- Being in the 21st Century: Toward New Paradigms, Policy, and Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Global Population Health and Well- Being in the 21st Century: Toward New Paradigms, Policy, and Practice:

"This book provides an excellent foundation for students seeking a context for global models and practices in population health...an excellent primer for those who are ready to engage in global health projects."--Jay E. Maddock, *PsycCRITIQUES*"A must read for public health, clinical, and social care students, teachers, and practitioners alike, including case studies to provide a thorough and up-to-date account of the past, present, and future of global public health. Dr Lueddeke effectively highlights the ingenuity gap between today's wicked problems and their potential solutions, with a timely emphasis on the concepts of "planetary health" and "integrative ecological public health"... [A] very informative and groundbreaking read." -- Dr Behrooz Behbod, MB ChB MSc ScD MFPH, Founder, Oxford Public Health Ltd, *Oxford Book Review*"This book delivers a timely and holistic perspective on population health, providing data and support for innovating and integrating clinical medicine, public health, wellness practices, and healthcare education worldwide... Fills a gap in the literature by addressing population health from a global perspective and considering global public health from the viewpoints of the individual and from the biopsychosocial model of health. Score: 93 - 4 Stars!" --Ruthann Russo, PhD, JD, MPH, LAC, The College of New Jersey, *Doody's Reviews*"This is a remarkable, much-needed book that fills a significant gap in the health and social care literature in the early decades of the 21st century - public, global, clinical, ecological. It is powerful, ambitious, comprehensive, and sweeping at the same time that it is visionary, focused, and deep. Its power and passion are about the potential of population health and well-being optimally applied around the globe to help in creating a world that is healthier, safer, more just, and more sustainable." --Barbara K. Rimer, DrPH, Alumni Distinguished Professor and Dean, UNC Gillings School of Global Public Health, University of North Carolina at Chapel Hill (From the Foreword) Drawing on current research and the expertise of world-recognized leaders in public, global, clinical, and social health in both developed and developing nations, this book delivers an evidence-based examination of 21st-century challenges in global population health and well-being. With special attention given to major initiatives of the United Nations, especially its Sustainable Development Goals (SDGs) 2016 - 2030, and the priorities of the World Health Organization (WHO) and the World Bank, Dr. Lueddeke articulates an imperative to adopt a "One World, One Health" view that recognizes the interdependence of humans, animals, plants, and the environment. The book/text promotes innovative and transformative paradigms for global public health practice, curricula, workforce training, and leadership. Intended for undergraduate and postgraduate courses in global public health, it will also be a welcome addition to the libraries of practitioners and policy-makers at all levels in the public/population/global health continuum. **KEY CONTENT AREAS INCLUDE:** The historical context of public health from early medicine to present day Exemplary educational initiatives: WHO education guidelines; curriculum commentaries from China, South Africa, and Cuba; a proposed Global Framework for Public Health Services and Functions; and case studies from South America (PAHO/ WHO), India (IPHF), and South Africa (PHASA) The changing roles and educational expectations of public and global health professionals in the early decades of the 21st century The complex interdependence of natural, socioeconomic, and political systems at local, national, regional, and global levels The causes of interstate conflicts and longer-term challenges Leading change in a new era, transforming mind-sets, and improving and sustaining the health and well-being of the planet and its people An epilogue on global health, governance, and education with contributions from a think tank of 35 practitioners from 27 nations Supplemental materials, including text aims and objectives and a guide to research and learning resources developed by experts in the United States, Brazil, and the Netherlands, are available as digital downloads **ALSO HIGHLIGHTED:** 65 profiles of leading global health (and health-related) organizations 15 profiles of highly recognized schools and institutes of public health

About the Author Publishing widely on educational transformation, innovation, and leadership, his latest book, *Transforming Medical Education for the 21st Century: Megatrends, Priorities and Change*, now also translated into complex Chinese, complements and builds on the seminal *Lancet Commission global report 'Health Professionals for a New Century: Transforming Education to Strengthen Health Systems in an Interdependent World'*. Invitations he has received as a keynote speaker/presenter include, among others, the UK General Medical Council (GMC, London); Universitas 21 UN Millennium Development Goal Workshops (UNMDG, Dublin); the Association of Schools of Public Health in the European Region (ASPHER, Brussels, Maastricht); the American Medical Association (AMA, Chicago); the Public Health Association of South Africa (PHASA, Polokwane); the European Public Health Association (EUPHA, Glasgow); the Catharina Pijls Lecture for the Annual Maastricht Symposium on Global and European Health (Maastricht University); the World Mental Health Association (WMHA, Athens); and the Faculty of Nursing (Chiang Mai University, Thailand) international conference on 'Optimizing Healthcare Quality: Teamwork in Education, Research, and Practice'. He lives in the New Forest, England, with his wife Jill and family members.
