**American School Of Home Economics : Handbook of Health and Nursing; A Complete Home-Study Course Comprising: Household Bacteriology (Classic Reprint)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Handbook of Health and Nursing; A Complete Home-Study Course

Comprising: Household Bacteriology (Classic Reprint):

January 1, My dear Madam: In beginning our work in Household Bacteriology together I should like to make a few suggestions as to aims and methods of study. The aims to be reached in the study of any science are at least two a knowledge of its underlying principles and as thorough an application of those principles as is possible. For the principles you will consult the lesson booklets. From them, too, you will get suggested applications, but the subject will not become a part of yourself until you recognize new applications many times a day. It is said that no person KNOWS a foreign language until he can think in that language. In a similar way you will want to think these facts into your life and work. Suggestions for study have already been given to you. I hope that you may be able to try all of the experiments suggested; at least make a dust garden as described. If you can get no suitable dish, a regular Petri dish may be obtained through the School for 30 cents and a tube of prepared nutrient gelatine, for 20 cents. The dish may be returned. Also, I hope that you will read some of the books recommended in the bibliography. The facts of bacteriology underlie so firmly all our daily living that there is no need to go far afield for illustrations. But a thorough knowledge of the science can be gained only through laboratory methods and with a microscope. (Typographical errors above are due to OCR software and don't occur in the book.) About the Publisher Forgotten Books is a publisher of historical writings, such as: Philosophy, Classics, Science, Religion, History, Folklore and Mythology. Forgotten Books' Classic Reprint Series utilizes the latest technology to regenerate facsimiles of historically important writings. Careful attention has been made to accurately preserve the original format of each page whilst digitally enhancing the aged text.
