Sponsored by the Society of Pediatric Psychology, this authoritative work is recognized as the definitive reference in the field. In concise, peer-reviewed chapters, leading authorities comprehensively examine links between psychological and medical issues from infancy through adolescence. Psychosocial aspects of specific medical problems and developmental, emotional, and behavioral disorders are explored in depth. The volume discusses issues in training and service delivery and reviews evidence-based approaches to intervention and prevention. See also *Clinical Practice of Pediatric Psychology*, edited by Michael C. Roberts, Brandon S. Aylward, and Yelena P. Wu, which uses rich case material to illustrate intervention techniques.

"Handbook of Pediatric Psychology, Fourth Edition, is an essential reference for mental health and medical professionals who work with children and adolescents experiencing health-related difficulties. The contributors are a virtual 'who's who' of the field, and their chapters are uniformly up to date and of exceedingly high quality. One is hard-pressed to find a major topic of relevance to pediatric psychology that is not covered in this volume. It is an ideal text for graduate courses in pediatric and child health psychology, as well as courses that attempt to provide a broad perspective on clinical child psychology."--James H. Johnson, PhD, ABPP, Director of Clinical Training, Department of Clinical and Health Psychology, University of Florida "This extraordinary book conveys the breadth and excitement of the field of pediatric psychology. The fourth edition captures many advances in the field and includes new chapters on 21st-century issues such as the integration of behavioral health into primary care settings, inpatient consultation-liaison services, evidence-based practice, and much more. The updated chapters on cultural and diversity issues are important, given trends in population diversity. A remarkable, monumental work."--Diane J. Willis, PhD, Department of Pediatrics (Emeritus), University of Oklahoma Health Sciences Center
