Michael H. Cohen : Healing at the Borderland of Medicine and Religion (Studies in Social Medicine) before purchasing it in order to gage whether or not it would be worth my time, and all praised Healing at the Borderland of Medicine and Religion (Studies in Social Medicine):

One of the transformations facing health care in the twenty-first century is the safe, effective, and appropriate integration of conventional, or biomedical, care with complementary and alternative medical (CAM) therapies, such as acupuncture, chiropractic, massage therapy, herbal medicine, and spiritual healing. In *Healing at the Borderland of Medicine and Religion*, Michael H. Cohen discusses the need for establishing rules and standards to facilitate appropriate integration of conventional and CAM therapies. The kind of integrated health care many patients seek dwells in a borderland between the physical and the spiritual, between the quantifiable and the immeasurable, Cohen observes. But the present environment fails to present clear rules for clinicians regarding which therapies to recommend, accept, or discourage, and how to discuss patient requests regarding inclusion of such therapies. Focusing on the social, intellectual, and spiritual dimensions of integrative care and grounding his analysis in the attendant legal, regulatory, and institutional changes, Cohen provides a multidisciplinary examination of the shift to a more fluid, pluralistic health care environment.

Cohen is a leading authority in an exceedingly important but as yet relatively uncharted area of discussion that has serious implications for our society. Recommended.--ChoiceProvide[s] a framework and gives us possible explanations and places for religion and alternative medicine in the current system of care.--*Journal of the National Medical Association* Michael Cohen eloquently explores pathways to healing--a universal human desire. He opens our eyes to new ways to think about health--beyond the exclusivity of science and medicine to a wonderful array of different traditions and methodologies. For modern health care professionals, this book offers rich rewards.--Lawrence Gostin, Georgetown University Law Center and the Center for Law and the Public's HealthFrom the Inside FlapOne of the transformations facing health care in the twenty-first century is the safe, effective, and appropriate integration of conventional, or biomedical, care with complementary and alternative medical (CAM) therapies, such as acupuncture, chiropractic, massage therapy, herbal medicine, and spiritual healing.
