Judith J. Baker, R. W. Baker : Health Care Finance: Basic Tools for Nonfinancial Managers before purchasing it in order to gauge whether or not it would be worth my time, and all praised Health Care Finance: Basic Tools for Nonfinancial Managers:

11 of 13 people found the following review helpful. Ok basic, but not too helpful By Anna Petrova This book gives a good basic overview of the health care finance. Its best feature is that it is applied to health care only, so you don't have to go through other business models. I cannot see using it in the future though - if you are planning to manage your office/work on a budget/evaluate your organization from a financial stand point, this is not the book you will need.

A practical financial management text for those who need basic financial management knowledge and a better understanding of health care finance, using actual examples from hospitals, long-term care facilities, and home health agencies. Overviews health care finance, and covers managerial accounting

About the Author Patricia A. Baker is Head of Classical and Archaeological Studies at the University of Kent. She was made a Fellow of the Society of Antiquaries in 2006. She is an active field archaeologist and has participated in excavations in the United States, United Kingdom, and Italy. She is currently working on a project in Monte San Martino ai Campo, Trentino, Italy, a multi-period site dating from the Iron Ages to the Middle Ages. She is author of *Medical Care for the Roman Army on the Rhine, Danube and British Frontiers in the First, Second and Early Third Centuries AD* and editor of *Medicine and Space: Body, Buildings and Borders in the Classical and Medieval Traditions, Practitioners, Practices and Patients: New Approaches to Medical Archaeology and Anthropology and TRAC 98: The Theoretical Roman Archaeology Conference Proceedings 1998*.
