concerned american, the claw back back is disturbing. will the claw back depend on your political party?????d a lot0 of 1 people found the following review helpful. Knowledgeable and InformativeBy Robert WoodWritten as a one-on-one conversation and it is easy to understand. The author specifically targets the upcoming problems that will arise for all Medicare and non-Medicare providers by the year 2015, and he offers solutions that will create a fully compliant and ease of process for those providers. A "MUST read and apply" book.

If you are in the health care industry, then you must be aware of the massive changes set forth by Medicare, how those changes are directly impacting you now, and how they will continue to impact you in the future. Warren Buffett says the language of business is accounting. For you as a health care provider, the language of health care is documentation. And in order to get paid by Medicare, you must know how to document properly and how to speak in their ever-changing required language. In this book, you will be introduced to the new and exciting world of physician documentation. You will learn about the primary changes that are occurring now and that are yet to come. You will be empowered with insights, information and tools such as Codeable Language to help you properly document and succeed as a physician. Mark Kimmel, Ph.D. creator of Codeable Language and author of this book, exposes the changes in Medicare and the ripple effect it is having throughout the health care industry. He walks you through what you need to know and do to protect yourself and guides you on what you can do now to position yourself for success.

About the AuthorA California Christian University graduate with a PhD in both Education and Theology, MARK KIMMEL has been bringing people to the best health while improving systems and lives for more than 20 years in the medical field, from working in hospitals caring for others, leading and creating programs, to doing medical missionary work all over the world. He is best known for his skills in leadership, clinical knowledge and understanding of workflows. Mark created Codeable Language and co-founded MediProfit, a computer software system and training program that assists hospitals and health care providers with clinical documentation. He is a leader in trending and tracking the changes in Medicare and helping health care provider to succeed.
