Ashraf A. Hilmy : Health-Care Reform: A Surgeon's Perspective before purchasing it in order to gage whether or not it would be worth my time, and all praised Health-Care Reform: A Surgeon's Perspective:

0 of 0 people found the following review helpful. InformativeBy Shereef hilmyAn insightful review of our complex medical system. It offers different approaches to meaningful solutions.

In this study, Dr. Ashraf A. Hilmy, with a surgeon's objective, no-nonsense precision and an unabashed lack of political correctness, dissects the current state of health-care delivery in America. In practice since 1979, he is board

certified in surgery, anesthesiology, critical-care medicine, and health-care administration. He received an MBA from the University of Texas, Pan Am with an emphasis on health-care administration. He has served as both chief of surgery and staff at several institutions and has practiced in every scale of facility-solo, partnership, and group practice. Dr. Hilmy is uniquely qualified to render an informed opinion about health care in the United States. In his professional judgment, there is no question that the current system is faltering and in need of radical reform. No other country in the world spends so much on health care and has so little to show for it. Written with the layperson in mind, Health-Care Reform offers insightful, well-researched, supported arguments. Though it does not set out to offend anyone, people will be offended-as a portion of the drivers of escalating health-care costs are laid squarely on their shoulders. Health-Care Reform addresses how health care is delivered in America. By comparing our delivery system to those used around the world, Dr. Hilmy breaks down different cost drivers with anonymous case examples, and finally, offers suggestions for realistic reform.

About the AuthorDr. Ashraf A. Hilmy has a solo surgical practice in Texas. An assistant professor of surgery, he is actively involved in teaching medical students and surgical residents. He is a poet, songwriter, and avid photographer. Originally from Egypt, he has lived all over the world, observing many systems of health-care delivery.
