**Duane Matcha : Health Care Systems of the Developed World: How the United States' System Remains an Outlier** before purchasing it in order to gage whether or not it would be worth my time, and all praised Health Care

## Systems of the Developed World: How the United States' System Remains an Outlier:

Presenting a brief analysis of health care systems in industrialized nations, the author includes the history, current realities, financing and delivery of services, as well as the impact of the systems on the core sociological variables age, sex, social class, and race and ethnicity. The systems spotlighted are those in the United States, Canada, Great Britain, Germany, Sweden, and Japan. The author's study of these varied health care systems shows two models are significantly more comprehensive, regardless of country, and that health outcomes are differentiated on the basis of sociological variables, regardless of health care systems.

About the Author DUANE A. MATCHA is Associate Professor of Sociology at Siena College in Loudenville, New York.
