I found that purchasing the 6th edition (at a much lower price) worked for my class. It first I was skeptical having the earlier version, so I emailed the publisher, asked and received the 7th edition updates for free. Works for me!0 of 0 people found the following review helpful. Healthcare in AmericaBy Cheryl E. HahnI liked the book and am planning to purchase updated version. It was informative. I like the author. Easy to read.0 of 0 people found the

Health Care USA, Sixth Edition is an ideal text for introductory courses on the organization and delivery of U.S. health care for students in schools of public health, medicine, nursing, dentistry, health administration, and other health professions. It provides an introduction to the health care system and an overview of the professional, political, social, and economic forces that have shaped it and will continue to do so. The Sixth Edition has been thoroughly revised to reflect the most recent changes of this growing and dynamic industry. Revisions include: Updated data on the size and cost of the U.S. health care system. New information on Managed Care Organizations, PPOs, and HMOs. New information on the variety of efforts of hospitals to reduce medical errors. Developments from the Freedom Commission on Mental Health initiative. A new discussion on the hospital competition with privately owned outpatient facilities. Updated Department of Labor estimates on health care personnel and the factors that influence demand and utilization. New data on the number of un- or under-insured Americans. A new discussion of government and private insurer cost savings initiatives through education and case management. A new discussion of the effect of the influx of Iraq War casualties on VA services. Updates on federal, state, and local public health initiatives in emergency preparedness. and much more!

About the AuthorHarry A. Sultz, DDS, MPH. is Professor Emeritus of Social and Preventive Medicine at the University at Buffalo School of Medicine and Biomedical Sciences and Dean Emeritus of its School of Health Related Professions.
