praised Health Insurance Exchanges and the Assistance Role of Navigators (Health Care Issues, Costs and Access):

The fundamental purpose of a health insurance exchange is to provide a structured marketplace for the sale and purchase of health insurance. The authority and responsibilities of an exchange may vary, depending on statutory or other requirements for its establishment and structure. This book outlines the required minimum functions of exchanges, and explains how exchanges are expected to be established and administered under the ACA. The coverage offered through exchanges is discussed, and the book concludes with a discussion of how exchanges will interact with selected other ACA provisions.
