**Anthony Hellen : Health of Nations: Medicine, Disease and Development in the Third World** before purchasing it in order to gage whether or not it would be worth my time, and all praised Health of Nations: Medicine, Disease and Development in the Third World:

This work focuses on the challenge to Third World countries of managing the problems resulting from the complex interrelationship between health and development. It assumes that most of the problems are multi-faceted and that solutions will, therefore, require an interdisciplinary approach.
