Kieran Walshe, Judith Smith : Healthcare Management before purchasing it in order to gauge whether or not it would be worth my time, and all praised Healthcare Management:

"This is an outstanding book that provides the concepts and tools necessary to enable healthcare managers and policy makers to build better health care systems. The book maintains the strengths of the first edition and adds new chapters and updated content throughout to make the book more international and comprehensive in its coverage of topics." Tom Rundall, Professor of Organised Health Systems, University of California at Berkeley, USA "This book covers

the main areas of knowledge which managers need, and gives tools for thinking and empirical examples relevant to current challenges. Evidence based management might not always be possible, but this book gives a way for a manager to become research-informed and therefore more effective." Professor John vretveit, Director of Research, The Karolinska Institute, Sweden This newly revised edition of a well-known text, offers a comprehensive overview of the complexities of healthcare organisation and management. It is a welcome and timely addition to the genre suitably impressive Nursing Times, May 2012 This popular book is amongst the most comprehensive textbooks on healthcare management available. Written with healthcare managers, professionals and students in mind, it provides an accessible guide to healthcare systems, services, organisations and management. Key areas include: Allocating resources for healthcare: setting and managing priorities Health technologies, research and innovation Internationalisation of health systems and policies Healthcare services: structure and delivery Chronic disease and integrated care Healthcare leadership and networks: incentives, governance and performance The new edition features an updated structure to support teaching and learning and thirteen new chapters which draw upon a wealth of experience from leading international experts in the field. This includes references to practical policy and case study materials, chapter summaries focusing on key points, self-assessment learning exercises, further reading and links to useful web-based resources. Healthcare Management is valuable reading for students and healthcare professionals involved in management, research and health policy making. The links between the theory and practice of healthcare management are skilfully explored and the authors show how best practice within healthcare systems can be maintained. Contributors Vidhya Alakeson, Ruth Boaden, Jeffrey Braithwaite, Iain Buchan, Mirella Cacace, Naomi Chambers, Elaine Clark, Helen Dickinson, Jennifer Dixon, Barrie Dowdeswell, Jon Glasby, Scott Greer, Anthony Harrison, Paula Hyde, Valerie Iles, Ann Mahon, Russell Mannion, Anne McBride, Andrew McCulloch, Shirley McIver, Matt Muijen, Ellen Nolte, James Raftery, Suzanne Robinson, Rebecca Rosen, Judith Smith, Helen Sullivan, Anne Tofts, Kieran Walshe, Iestyn Williams, Juliet Woodin and Steve Wright.
