**Tim Scott, Russell Mannion, Huw Davies, Martin Marshall : Healthcare Performance and Organisational Culture** before purchasing it in order to gage whether or not it would be worth my time, and all praised Healthcare Performance and Organisational Culture:

People from different cultural backgrounds prefer adhering to their own religious beliefs which could restrict treatment options leading to the detriment of health especially if it involves the health of a disabled child. This comprehensive but concise work highlights the problems faced in managing the care of disabled children from different cultural

backgrounds. It examines the problems inherent in the medical social and educational management of children with developmental disability in populations whose value systems differ from other cultures. In particular it considers how care may be varied according to cultural background without compromising its quality. The book is of immense value for all healthcare and social care professionals policy makers and shapers patient organisations and those with an interest in medical ethics.
