Visual Reference Publications : Healthcare Spaces No.3 before purchasing it in order to gage whether or not it would be worth my time, and all praised Healthcare Spaces No.3:

2 of 2 people found the following review helpful. architects excelemt bookBy M. Tahir Khalidii am an architect and interior designer and i have found this book extremly useful interms of extraordinary elevations of the hospital buildings.i have specifacally purchased this book for the interiors of hospital's different sections and i found so many different themes to design with so many colorful images and views from different angle. it is resource book for designers.1 of 3 people found the following review helpful. thank you!By Masahiro Kobayashii accepted my purchased book.i like very beautiful design and interesting contents.if there is other chance, i'd like to purchase your

good books.thank you.

Healthcare Spaces No. 3 showcases impressive modernistic work by some of the leading architects and interior designers serving the nation's health care institutions. Over 40 design firms present their 150+ trendsetting projects with over 800 color images in this 360-page, four color book. Health care administrators, physicians, medical planners, their architects and interior designers will find this an superior way to assess how public and private institutions are coping with the opportunities and challenges of managed care, advances in medical science and technology, aging populations and the drive towards patient-focused care. This profound change in the delivery of health care is revealed in projects ranging from neighborhood clinics, surgery centers and medical offices to replacement hospitals and vast medical campuses. Showcased are not only the advances in technology but also how the health care institutions are morphing into more spa-like phisiques. This volume reveals the most current examples reflecting this trend. Organized alphabetically by design firm, Healthcare Spaces No. 3 is user friendly, with each project indexed for easy reference. In this book, health care professionals as well as architects and interior designers serving public and private health care institutions will find exciting new approaches to their work. 360 pages 800 color images 9"x12" / hardbound

From Library JournalThe editor of Hospitality and Restaurant Design No. 2 and Corporate Interiors No. 4, Yee has assembled a catalog of 100 medical and fitness facilities recently completed in the United States by 34 top design firms. The photos are glossy, and the text is upbeat. The complete package, however, recalls Stephen Verderber and David Fine's condemnation of "coffee-table books [that] tend to provide scant narrative on planning and design and tend to eschew critical analysis" (Healthcare Architecture in an Era of Radical Transformation, Yale Univ., 2000). Oblivious to the inequitable and chaotic state of our nation's healthcare systems, Yee depicts the healthcare environment as a Shangri-La where pampered consumers exercise "the power of choice" in settings reminiscent of luxury hotels or spas. For a better understanding of current trends, get the Verderber and Fine book. Yee's book is recommended only for healthcare administrators, architects, and design consultants who prefer not to be distracted by the troubling realities of healthcare provision while they ponder color schemes, fabrics, furnishings, and ambience. David Soltsbquo;sz, Cuyahoga Cty. P.L., Parma, OH Copyright 2002 Cahners Business Information, Inc.About the AuthorRoger Yee, a graduate of the Yale School of Architecture, has been honored by the American Institute of Architects and the American Society of Interior Designers. The creator of InterPlan, the New York interior design expo, he lives in New York City.
