It transcends the spiritual, science and fiction into a realm that has an amazing story line. This was awesomely written and perfectly executed in every aspect.0 of 0 people found the following review helpful. Five StarsBy Jessicareally happy to own.1 of 2 people found the following review helpful. It was goodBy Xavier Zavala HerasThis last chapter for the Earth X saga was good. It wasn't , but it was very good. Didn't end up with a bang, but I was pretty satisfied at the end.I don't give it 3 stars because the book is good to have 4, but I won't give 5 stars because I think the saga is king of incomplete. I have a lot

of questions of my own (like who is Daredevil, what will happen with Franklin Richards, will Captain Britain score with Medusa or not...). Anyway, a whole bunch of questions. Maybe they are all answer on the Companion, who knows. Anyway, the final book is good. I'm happy to have the whole saga.

Earth X is a 1999 comic book limited series written by Jim Krueger with art by John Paul Leon and published by Marvel Comics. Based on Alex Ross' notes, the series features a dystopian future version of the Marvel Universe. The series was followed by two sequels, Universe X and Paradise X. The universe of Earth X is designated as Earth-9997.
