Here we have three main novels collected followed by three shorts, and they're mostly pretty good.Bad BloodA psycho Predator who has killed the rest of his clan crash lands on Earth and wreaks a whole lot of havoc in the Pine Barrens of New Jersey. This is a really entertaining story that keeps you guessing as to who's actually going to live or die. It's pretty substantial in length, and the only downside of this is that the ending is a little

drawn out. Overall though, this is a very good read.4/5KindredPredator - Kindred is an awesome story. It follows the serial killer motif established in Bad Blood and is about an escaped lunatic killer in a small Oregon town. The main character's father was killed by a Predator when he was a small child, and when he finds out the same one has returned, his objective is to destroy it. Kindred is easily one of the best Predator graphic novels out there. It's well written, illustrated, and is easy to follow. This is the kind of material that could be well adapted into a film.5/5Hell and Hot WaterI'd read some quick reviews of this saying that it wasn't that great, and it really isn't. The art is sort of colored pencil-like, and not bad. Unfortunately, the story is just hard to follow and not as interesting as you'd think. A Predator ship is observed crashing into the ocean, so a bunch of special agents dive down to find the Predator. Mayhem ensues when they find themselves in a hidden underwater cave with crazy tentacle monsters.2/5Strange RouxThree men hunting in the Louisiana forest stumble upon a Predator. I really like the style of the artwork and the story is interesting and simple. It captures some of the original spirit of the films, yet has a quirky and original ending.4/5No Beast So FierceA hunting party goes out into the wilderness to hunt a lion which has killed the husband of the woman paying them to hunt the lion down. A Predator appears. That's about all you need to know. This would be better expanded upon into a full length story, but instead it's compressed into only a few pages.2/5Bump in the NightThree kids camping out in their backyard in Florida wander out into the swamp and discover a Predator.3/5If you enjoyed the first two volumes, this is worth a purchase. Bad Blood and Kindred are very good, Kindred makes this worth the purchase by itself.0 of 0 people found the following review helpful. Death often hides in the dark, isolated corners of the earth in thick woods, steaming swamps, or angry seas. These natural dangers of animal, weather, and terrain often give rise to legends and folk tales of demons, serpents, and ghosts to put an understandable face to the unknown. And while many myths have a basis in reality, some are reality, the reality of the presence of Predators: alien hunters as savage as they are intelligent, as cunning as they are merciless. And when rational men stand face to face with a sea serpent, a Gollywomp, or the New Jersey Devil bent on taking trophies, they have but two choices fight the myth or become history!
