It was sent in a solid box and protected with plastic inside. When I came back from holiday I took it rideaway home and start reading it. Thanks for helping me out. And for the future I will first look at your site for books. Thanks! Kind regards Peter Derksen, optometrist FAAO, Arnhem The Netherlands

An introduction to low vision rehabilitation, this text is organized to simulate the actual sequence of clinical evaluation and management. It moves from case history, examination and diagnostic trial of devices to prescription of devices, other management options and personal experiences.

From the Back Cover This book serves as a comprehensive introduction to low vision rehabilitation. Organized to have a logical flow similar to the actual sequence of clinical evaluation and management, the book begins with an introduction and then moves to case history, examination, diagnostic trial of devices, prescription of devices, other management options, case examples, and then concludes with personal experiences that reflect the lessons learned.
