From Springer : Procedural Dictations in Image-Guided Intervention: Non-Vascular, Vascular and Neuro Interventions before purchasing it in order to gage whether or not it would be worth my time, and all praised
Procedural Dictations in Image-Guided Intervention: Non-Vascular, Vascular and Neuro Interventions:

This book is designed to provide the practicing interventionist with a comprehensive list of procedural reports that covers the vast majority of the currently performed interventional procedures outside the cardiac system. It offers up-to-date explanatory notes, synopsis of the indications, contraindications and potential complications in an organized and practical format that follows the various body systems and progresses from the simple image guided FNA to the most complex procedures and incorporates the current societal guidelines. The book is divided for ease of reference into three main parts: Non vascular, Vascular and Neurovascular interventions. This information is not currently available in any single publication. The text provides residents, fellows as well as staff members with a quick, detailed and user-friendly resource for documentation of image-guided interventional procedures that will facilitate their tasks, improve the standard of documentation and reduce errors. The text can serve as a valuable tool for a quick review prior to a procedure or in preparation for an oral board certifying examination. The entries are vetted by recognized experts in the field of image-guided intervention.
