Roland Neseth, Erica Koch Williams : Procedures and Documentation for CT MRI before purchasing it in order to gage whether or not it would be worth my time, and all praised Procedures and Documentation for CT MRI:

The second book in a four-book series, geared for the advanced exams taken by radiologic technologists. Written in response to the ARRT requirement for proof of competency in specific modalities prior to taking advanced level exams. In order to achieve competency in a specific modality the student must demonstrate, complete, and document performance of the specified competencies. The book lists the particular competency, demonstrates how to perform the exercise, and provides a documentation page for verification purposes. The book serves as a tool that Radiologic Technology students can carry from test to test and from site to site which not only reviews the upcoming test, but also serves as an official recorder for documentation. Sample checklists supplied by the ARRT have also been incorporated

into the book.
