**Richard Beebe, Myers : Professional Paramedic, Volume III: Trauma Care EMS Operations (Professional Paramedic Series)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Professional Paramedic, Volume III: Trauma Care EMS Operations (Professional Paramedic Series):

0 of 0 people found the following review helpful. Great Operations section. By Ellen I ordered this book for my Paramedic class primarily for the Operations section. The layout and content covers topics that go beyond vehicle extrications, incident command, and disaster response. There are over 300 pages that include chapters on ambulance safety, urban and wilderness search and rescue, and specialized interfacility transports. The power points are streamlined and editable, and the tests and quizzes easily upload into Blackboard. With the cost of books today, it is

nice that students have the option to rent the e-book.0 of 0 people found the following review helpful. The best!By Dan FriedmanThis is a continuation of the first volume.This is by far the most comprehensive and user friendly textbook I have read. It is up to date with current medicine and trends in pre-hospital care. A considerable learning tool that casts a shadow over other books. Definitely worth it!

Develop proficiency as a paramedic and deliver high quality critical care with the all-new Professional Paramedic Series! Based on the National EMS Education Standards, this economical three-volume series equips you with the resources necessary for both paramedic certification and re-certification. Comprehensive, yet street-friendly, each volume in the series walks you through the skills and concepts critical to the job of a Paramedic. The framework of each book is practical in approach: introducing principles, skills and terminology; presenting a typical case; walking through critical response steps; and again reviewing key concepts to ensure understanding for successful application on the job. Volume III: Trauma Care EMS Operations highlights special response considerations and a broad range of operational medical topics to prepare readers with the complete spectrum of knowledge required to succeed as a Paramedic. Topics include traumatic brain injury, environmental medicine, specialty care transport, triage systems, and much more. This book follows up on the fundamental information covered in Volume I: Foundations of Paramedic Care and the application of skills in emergency situations in Volume II: Medical Emergencies, Maternal Health Pediatrics. Practical and reader-friendly, each volume includes a full color design with detailed photos, graphics and step-by-step skill sequences to ensure you are fully prepared for the responsibilities, adventures, and challenges of a paramedic.

"This [series] goes into great detail and provides additional information where other textbooks stop. This additional information only makes a better, more knowledgeable paramedic and allows them to become critical thinkers." "The chapters have excellent content for the student. The level and depth of content presented is good for the paramedic I really like the enhancements [and] the scenarios the authors have used are very real to what would be actual EMS ambulance calls." About the Author Richard Beebe, MS, BSN, NREMT-P is the program director for Bassett Health Care's Center for Rural Emergency Medical Services Education in Cooperstown, New York. He is also a Clinical Assistant Professor at the State University of New York at Cobleskill, New York. Richard Beebe is also a practicing field Paramedic with the Guilderland Police Department, since 1988. Richard Beebe has a Masters degree in education, is a registered Nurse and a nationally registered Paramedic. Richard Beebe has been an EMS educator for over two decades and is a chapter member of the National Association of EMS Educators. Mr. Beebe is a state and national speaker, author or editor of several textbooks, and has been recently working in a leadership role on the committee for the National EMS Education Standards of the National Association of EMS Educators.
