It's a great book though I highly recommend it to anyone who wants to start reading the Alien

series.0 of 0 people found the following review helpful. Love itBy Brian BGreat tie in to both Alien and Prometheus movies and novels being published at same time as these comics.4 of 6 people found the following review helpful. Good story but way overpricedBy Lew KovarikIt is a really good concept. The story and graphics are great. The problem is too little story for the price. If it would have been longer I wouldn't have minded paying. Come on guys in the future give us more bang for our buck. I would have bought the next ones but not for this content at this price.

When the Prometheus never returned from her fateful journey to LV-223, the questions surrounding the origins of man went unanswered. Now a new team of explorers seeks to uncover the dark mystery that holds not only the fate of the original mission, but possibly their own damnation. This is the first volume of Prometheus in a blockbuster crossover event featuring Aliens, Predator, and Prometheus!
