It covers all the topics so u don't miss something! May need more info on something but it's a great reminder for looking up!1 of 2 people found the following review helpful. Five StarsBy Myk,DGood quality flash cards3 of 3 people found the following review helpful. Great Study Tool!By April FordI am a hands on, visual learner so these were perfect for me. I chose these over the phone app because again I learn better with something tangible to look at and write on. I love that they include a small ring so that you can divide out the section you want to focus on. I can throw them in my bag and study wherever I am. Some of the wording is a little different from what I was taught, but in a way that is good since we

have no idea what the boards might be like. Overall I think these were worth the money.

I literally bought these cards, took them to work one day hoping to study them when I could (so I took the packaging off) and then never used them for studying (I didn't have much time before the test). Therefore, these cards basically sat in my trunk for months, not being used, however some cards got stuck together from the heat but damage is mainly to the edges of the cards. Outside package has more use.
