Marie Truglio-Londrigan, Sandra B. Lewenson : Public Health Nursing: Practicing Population-Based Care before purchasing it in order to gauge whether or not it would be worth my time, and all praised Public Health Nursing: Practicing Population-Based Care:

0 of 0 people found the following review helpful. Probably worst text that I have ever been forced to use By Brianne Probably worst text that I have ever been forced to use. I have actually used google and papers the authors have written explaining items in their book, more than the actual text. They have an amazing article pertaining to the 7-A's online, wish they had included a better explanation in the book I was forced to buy. 0 of 0 people found the following review helpful. Great By Carol E. Great 3 of 3 people found the following review helpful. OK, its public health.... information is abundant on the web,... By opaiits ok, informative and easy read. Needed it for class but as long as you know what content to cover, you can find information elsewhere. ...

With new chapters on disaster management, primary health care, and new technologies used in public health nursing and public health education, this newly revised edition of *Public Health Nursing: Practicing Population-Based Care* is a must-have resource for students interested in public health nursing and education. *Addresses the relevance of historical evidence in defining public health *Explores the use of technology in public health *Provides the meaning of social epidemiology *Offers an innovative assessment tool that uses Healthy People 2020 as its framework *Focuses on 17 intervention strategies identified in the Population-Based Public Health Nursing Practice Intervention Wheel *Examines how these interventions can be applied to the three levels of practice: individual/family, community, and systems *Accompanied by a forthcoming Companion Website packed with online learning tools and activities to help engage students and further their understanding of the material in the text
