Valerie Dietz Polansky MEd MLS (ASCP) : Quick Review Cards for Clinical Laboratory Science Examinations before purchasing it in order to gauge whether or not it would be worth my time, and all praised Quick Review Cards for Clinical Laboratory Science Examinations:

12 of 12 people found the following review helpful. A MUST for those taking the ASCP exam By SRA If I had to pick a single resource to study for the ASCP MLS exam, I would pick this. It's easy to understand, well organized and comes with helpful explanations for everything you would need to pass the exam. The charts and tables are superb. If you couple this with the CLS Review book from Harr, you'll pass the exam on your first attempt. I would suggest getting the physical cards that you can hold in your hands rather than the electronic format b/c you can make notes on them and divide them up into smaller piles by subject. I have a review site for this exam (look up wordsology on google) where I have some examples of the Polansky cards for you to take a look at if you are still not sure. 4 of 4 people found the following review helpful. GREAT REVIEW FOR ASCP EXAM! By giovanna ferraro I just want to say that these cards are AMAZING! I took them to kinkos to hole punch the corners (cost me about \$2) and then bought binder clips from staples (about \$6) and was able to separate each section so I can pick and choose the sections I want to study. The charts are so great and makes it so easy to learn the different anemias, bacteria, coagulation factors, etc. I am also taking practice tests on labce.com and as I study each section, I see my scores going up drastically. I'm not one who can sit and study for hours so these are great because I can keep them in my purse and pull them out for 10 minutes while in a waiting room or while eating lunch and learn little bits at a time. You definitely won't regret this purchase. 1 of 1 people found the following review helpful. I found the wording and content knowledge to also be great and the best part was that I passed my ... By E. Johnson These cards were very helpful when it came to reviewing for my boards. Unlike traditional textbooks I could carry these with ease without having a backache at the end of the day from lugging around text books. I found the wording and content knowledge to also be great and the best part was that I passed my boards the first time. So, if you are preparing for your boards save your back the hurt and purchase these instead.

"This is a substantial accomplishment for the author/editor. I will encourage the MT CLS Class of 2002 to consider purchasing this comprehensive review. Bravo!" -- John A. Mihok, MS Ed, MT, SM(ASCP), CLS, Medical Technology Director, Monmouth Medical Center, Long Branch, New Jersey
