Valerie Dietz Polansky : Quick Review Cards for Medical Laboratory Science before purchasing it in order to gage whether or not it would be worth my time, and all praised Quick Review Cards for Medical Laboratory Science:

4 of 4 people found the following review helpful. Must have reviewBy JaniceI purchased these cards through the bookstore at my school and I love them. I studies only from the cards and I passed both the ASCP technician and AAB technologist exams the first time. Now I have decided to take the ASCP MLS exam and and wanted to update my purchase. The new cards are smaller and come with a ring to attach them to. More convenient and portable than the originals. These cards are a must have for anyone who is either a student or recent grad prepping for their exam0 of 0

people found the following review helpful. A good supplemental learning tool, but don't solely depend on it
By Customer
Definitely a SUPPLEMENTAL learning material and when I mean that, it means you have to READ your med lab sci books to be able to decipher some tidbits of info you're going to encounter especially if you've been out of school for sometime (though clinical experience helps with condensation of what you've learned). Excellent point: summary of relevant info into tables illustrations w/c otherwise would be a nightmare to separately read in books. Overall, a good material in reviewing for the ASCP, though I would recommend co-studying other materials.

By Gina A.
I expected these cards to be much sturdier than they are. They come with a large ring so you can flip through the cards on the ring, but they won't last long getting flipped around on that ring because they are made of regular copy paper instead of some sort of card stock. These will rip out with regular use. The only reason they get 3 stars from me instead of only 2 is due to the fact that they do contain a lot of useful information that makes them handy for exam prep.

A complete study guide! Use these handy cards for course review now and exam prep later. More than 500 cards deliver concise, but complete coverage of the major disciplines on the Board of Certifications content outline and practice today.
