Great read!By Dr Michelle Zhou, ChiropractorDr Vaughan's book offers younger chiropractors such as myself valuable insight into a world we have never been exposed to and perhaps don't understand as well as we should - the struggle and discrimination the pioneering doctors of our profession

endured through a period where chiropractors weren't widely accepted, as well as their relentless passion and belief in chiropractic. A must read for chiropractors around the world!

The author of *Rabid Dogs in the East* takes us through the chiropractic profession's struggle to gain acceptance. The reader experiences the frustrations of a young chiropractic graduate who finds himself in a very hostile environment. Medical opposition in the 60s turns to inhuman, determined and illegal protectionism in America, where leading anti-chiropractic crusaders described them as "rabid dogs", "killers", "unscientific cultists" and of course "quacks". Dr. Bruce Vaughan found a similar attitude when he opened his practice in Hong Kong. *Rabid Dogs in the East* describes the constant fight he had to build his own practice as well as establish a recognized profession in the British Crown Colony of Hong Kong and latterly the Special Administrative Region of China. It is a fascinating insight into life in Hong Kong as it goes through the changes from the fifties to the present day, as seen through the eyes of an American trained British chiropractor. *Rabid Dogs in the East*, although interspersed with humor, does not pull any punches or hide the anger that has built up over the years of antagonism.

From the Author: Have experienced, first hand, the struggle against medical establishment opposition to chiropractic in Hong Kong, I have a greater understanding of our history. Chiropractors have had to fight for the right to help their fellow man. This was particularly so in the early sixties in the US, when the AMA used their influence, in the most vicious and unsavory way, to destroy chiropractic. Things are better today, but the after-taste still lingers. There should never be a monopoly where it comes to healing. The main concern should be 'what is right for the patient' rather than who has the right to prosper from the suffering of mankind. About the Author: Bruce S. Vaughan DC, FICC. Graduated from Palmer College of Chiropractic USA. (1966) has practiced as a chiropractor in Hong Kong since. Founder President of the Hong Kong Chiropractors Association. Council member, (Asia), of the World Federation of Chiropractic, and was President, (2000 - 2002). Chairman of the Chiropractors Council (Hong Kong) (1993 - 2002). Bruce is still practicing and is the Senior Partner of Drs. B.S. Vaughan Associates (Chiropractors)
