Josh D. Luke, PhD, FACHE : Readmission Prevention: Solutions Across the Provider Continuum (Ache Management) before purchasing it in order to gage whether or not it would be worth my time, and all praised Readmission Prevention: Solutions Across the Provider Continuum (Ache Management):

0 of 0 people found the following review helpful. A Must ReadBy Christina C.I started reading and highlighting sections of the Readmission Prevention on a business trip. I became addicted and could not stop talking about it to my

colleagues. I work for a national Home Care company and so much of what Josh Luke presented on readmission prevention and has been instrumental in how we now work and care for our clients in the post acute care world. This is an excellent introduction in understanding how our healthcare world is changing. A must read. 0 of 0 people found the following review helpful. Amazing! No one is more qualified to write this book! By Kyle A Hill Hospitals and health systems are paying closer attention than ever to preventable readmissions, as new alternative payment model programs provide new revenue and cost savings opportunities. Dr Josh Luke offers a unique perspective as an ex-hospital CEO, internationally-recognized speaker and entrepreneur about ways to prevent high-cost utilization and achieving the triple aim. For any entity set to benefit from lower readmissions, this is a must read. 0 of 0 people found the following review helpful. Josh Luke hit it out of the park, this book significant changed my life and business. By Michael Townsend As a home care business owner this book has added tremendous value to my life. I gained a much deeper perspective to the health care industry with respect to Accountable Care Act trends, operating advice and key strategic ideas that have largely dictated the direction of our business. Josh is a clear thought leader and this book beautifully magnifies his knowledge of the industry.

As a result of the Affordable Care Act (ACA) of 2010, readmissions have become a new area of focus as care delivery moves from a volume-based model to a value-based one. Acute hospitals are calling upon post-acute providers to assist them in improving care coordination to avoid penalties. Post-acute providers are taking steps to become the provider of choice as hospitals, health systems, and managed care organizations turn to them for support. In the absence of proven historical programs, this book gives hospital executives and post-acute care providers proven tactics and tools they can apply to reduce and prevent unnecessary hospitalizations. Written in a conversational style by a seasoned healthcare executive, the book starts by defining the origins of readmissions and the impact of the ACA, then describes three phases of readmission prevention planning and offers innovative strategies for executives to position their facility as a provider of choice. Specific readmission prevention tactics are addressed for different levels of post-acute care, including: Acute Hospitals and health systems Skilled nursing facilities Physicians and Pharmacists Long-term acute care and acute rehabilitation hospitals Home health agencies Hospice and palliative care agencies Assisted-living facilities Home care and private-duty nursing Throughout the book, short perspectives written by experts in the different specialty areas provide additional viewpoints on critical issues in care transitions. The book concludes with case examples from healthcare organizations that have successfully implemented new tactics and strategies as part of a larger coordinated program in preventing readmissions.

"This is a quality book that will be very useful to leaders in the field. Differentiating itself from other books about readmissions, this one provides sound tactics for preventing readmission rates. Recommended for all to read!" -- Doody's Service About the Author Josh D. Luke, PhD, FACHE, is founder of the National Readmission Prevention Collaborative and a national thought leader and international speaker on the topics of care coordination, population health management, readmission prevention, and development of integrated post-acute care networks. He is a former hospital CEO, health system vice president, and nursing home administrator. Regarded as a futurist on the Affordable Care Act (ACA) and how it will shape the continuum of care, he has been described as an innovator, a forward thinker, and a strategist on teaching accountable care organizations, bundled-payment initiative programs, and hospital leaders how to position themselves for revenue growth in the transitional care and post-acute care sectors in a post-ACA model.
