Jonathan H. Burroughs : Redesign the Medical Staff Model: A Guide to Collaborative Change (Ache Management Series) before purchasing it in order to gage whether or not it would be worth my time, and all praised Redesign the Medical Staff Model: A Guide to Collaborative Change (Ache Management Series):

0 of 0 people found the following review helpful. Five Stars By Jodi Smith Awesome writer! Really good read and new way of looking at old systems

Healthcare organizations are facing many challenges in this new era of healthcare reform, one of which is to establish

a new operating model for the organized medical staff. Deeply rooted in tradition, the current medical staff model can no longer hold in an environment where quality, safety, service, and cost-effectiveness are required for healthcare organizations to not only survive but truly thrive. In this book, the author, an experienced physician leader and healthcare consultant, describes key changes that must be made to redesign the medical staff model. He provides specific guidance and examples to help healthcare leaders and executives work with their physician leaders to face these changes successfully. Well-regarded contributors and subject matter experts offer additional examples and insights with special content throughout the book. The author provides an in-depth look into: The evolution of the physician culture from autonomy to collaboration and accountability that must take place for US healthcare providers to remain competitive in an increasingly global economy Select strategic medical staff development planning and credentialing/privileging approaches that are needed to ensure physician organization alignment Components of an effective and rigorous performance management system that enables leaders to help physicians achieve mutually agreed-on goals and metrics and align them with those of the organization Medical staff performance assessment and improvement activities, including peer review best practices, ways to incentivize excellence, and how to address issues in a timely, compassionate way Negotiation of performance expectations with management and the hospital's board that are consistent with the organization's strategic plan Physician engagement and alignment strategies that will enable physicians and management to work together to achieve the goals of population health and reduced operating costs Healthcare executives and administrators, physician executives, and board leaders can use this book as a guide to learn from organizations that have successfully integrated and aligned with their medical staffs into a collaborative environment. Examples of organizations with medical staffs that have made a complete commitment to the success of their enterprises and the health of their communities are incorporated throughout the book.

About the Author Jon Burroughs, MD, FACHE, FACPE, is president and CEO of the Burroughs Healthcare Consulting Network Inc. He works with some of the nation's top healthcare consulting organizations to provide best practice solutions and training to healthcare organizations in the areas of governance, physician hospital alignment strategies, credentialing, privileging, peer review and performance improvement/patient safety, medical staff development planning, strategic planning, and physician performance and behavior management. He helps hospitals across the country develop new ways for physicians and managers to work together to solve quality, safety, operational, and financial challenges.
