Mary R. Fiorentino : Reflex Testing Methods for Evaluating C. N. S. Development (American lecture series, publication no. 865. A monograph in American lectures in orthopaedic surgery) (Portraits of the Nations Series)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised *Reflex Testing Methods for Evaluating C. N. S. Development* (American lecture series, publication no. 865. A monograph in American lectures in orthopaedic surgery) (Portraits of the Nations Series):

0 of 0 people found the following review helpful. great resource. Excellent review of evaluating primitive reflexes
By Customer
Quick and easy to understand, great resource. Excellent review of evaluating primitive reflexes.
0 of 0 people found the following review helpful. Had this 30+ years ago...
By Sewbeams
Had this 30+ years ago, lent it out and never got it back. It's a classic, that should be in every therapist's bookshelf.

By Mary R. Fiorentino, Newington Children's Hospital, Newington, Connecticut. With a Foreword by Burr H. Curtis. This book is useful in the initial and periodic examination of all infants and children through six years of age. It can be used in the diagnosis and evaluation of such patients where abnormal reflexive reactions are suspected. The assessment of other patients who might need neurophysio-logically oriented treatment is included. A basis for physiatrists which encompasses the diagnosis and program planning for rehabilitation is given. A section is provided for determining the maturation level and abnormal reflexes for a treatment program.
