I bought this book for my mom, she is a License Nutritionist in Puerto Rico and she was talking about the Register all my life. So I do my research and found this company with so many good reviews. The

book is very easy to read, and explains concepts very good. Also they have a contact email, and respond very quickly. I also buy Flash cards, and exam practice test, for only \$150. For me is great, because I am a medical graduate, on my way to get my boards, and all our books are 150 and up, each one! And I've been practicing the biochemistry and nutrition for my USMLE with her, and the flash cards are great. On first page of this book, Author tell you, to do practice questions, read, and review. Trust me, this are all the things you need to do. Study with a positive attitude, practice practice practice practice questions!!!, review questions and understand concepts. You can find what else I buy so you can revise, and see is worth for you.
