Emma K Stokes DipStat BSc(Physio) MSc PhD : Rehabilitation Outcome Measures, 1e before purchasing it in order to gage whether or not it would be worth my time, and all praised Rehabilitation Outcome Measures, 1e:

Rehabilitation Outcome Measures is a comprehensive review and comparison of measurement instruments in rehabilitation. It includes a high-level section on professional practice in physiotherapy and an introduction to the World Health Organisations (WHO) International Classification of Health. For those who wish to learn more about the relevance of reported measurement properties, the text focuses on how this knowledge can assist clinical decision-making. Additionally, the book reviews a range of measurements in neurological rehabilitation as well as mobility, fatigue, physical activity and patient satisfaction. Rehabilitation Outcome Measures is directed at students preparing for clinical practice, as well as researchers and practitioners seeking information about a range of measurement

instruments. Provides details on how to manage a project and select an outcome measure
Introduction to WHO's International Classification of Functioning, Disability and Health
Boxes with specific links to clinical decision-making
Easy format for review of measurement possibilities in each domain
Clear review of 36 measurement instruments
