disappointing. Even though companies are listed there is no mention if they hire contractor or employee status. Also many of the links seemed copied and pasted from job ads as when I clicked on them I was taken to pages that stated the job was no longer available. Also throughout the book the author plugs a webinar that costs \$99. I felt a lot could have been added to make this book beneficial and I feel I receive much more information for free just by networking in various coding groups through social media. 0 of 0 people found the following review helpful. Don't read By Kindle Customer It just give you a list of websites and things I know by just look up the program. I wish they would put thing in the books like a practice tests and thing you didn't know. 1 of 1 people found the following review helpful.
