**From Georgetown University Press : Replacement Parts: The Ethics of Procuring and Replacing Organs in Humans** before purchasing it in order to gage whether or not it would be worth my time, and all praised Replacement Parts: The Ethics of Procuring and Replacing Organs in Humans:

0 of 0 people found the following review helpful. A book everyone should read.By Callie ReaderA great update full of helpful information on the vitally important subject of organ donation.

In Replacement Parts, internationally recognized bioethicist Arthur L. Caplan and coeditors James J. McCartney and

Daniel P. Reid assemble seminal writings from medicine, philosophy, economics, and religion that address the ethical challenges raised by organ transplantation. Caplan's new lead essay explains the shortfalls of present policies. From there, book sections take an interdisciplinary approach to fundamental issues like the determination of death and the dead donor rule; the divisive case of using anencephalic infants as organ donors; the sale of cadaveric or live organs; possible strategies for increasing the number of available organs, including market solutions and the idea of presumed consent; and questions surrounding transplant tourism and "gaming the system" by using the media to gain access to organs. Timely and balanced, *Replacement Parts* is a first-of-its-kind collection aimed at surgeons, physicians, nurses, and other professionals involved in this essential lifesaving activity that is often fraught with ethical controversy.

This is a high quality work with detailed arguments pertaining to increased organ donation. . . . Due to its comprehensive nature and argument compilation, this is a significant addition to the field. \* Doody's Book \*

"Replacement Parts will serve as the volume of record on the ethics of organ transplantation for years to come. The editors have carefully woven together the best contributions in a way that makes the book highly valuable and accessible to students, instructors, researchers, and policymakers." Dominic Sisti, Assistant Professor of Medical Ethics, University of Pennsylvania

"The ethics of organ transplantation has been a core topic ever since the emergence of modern bioethics in the late 1960s. This expertly edited anthology provides a comprehensive examination of the complexities of the issue. It will be a key text for beginners as well as advanced students of the field." Jonathan Moreno, David and Lyn Silfen University Professor, University of Pennsylvania

About the Author Arthur L. Caplan is head of the Division of Bioethics at New York University Langone Medical Center and the author or editor of over thirty books and six hundred articles. James J. McCartney is an associate professor in the Philosophy Department at Villanova University and an adjunct professor in its School of Law. In the past he has been the ethics consultant for several major health systems in the United States. Daniel P. Reid is a recent graduate of Villanova University.
