Lauren K. Nelson : Research in Communication Sciences and Disorders: Methods for Systematic Inquiry, Third Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Research in Communication Sciences and Disorders: Methods for Systematic Inquiry, Third Edition:

Research in Communication Sciences and Disorders: Methods for Systematic Inquiry, Third Edition, is a

comprehensive yet comprehensible text meant for instructors and students of research methods in the field of communication sciences and disorders. This forward-thinking text reflects the movement toward evidence-based practice in audiology and speech-language pathology. The author ensures that the concepts associated with evidence-based practice are integrated throughout the chapters. Rather than treating empirical research and searching for clinical evidence as separate topics, this text presents both as different applications of a process of scientific inquiry. The order of the chapters reflects the steps a researcher or clinician might complete when conducting an investigation. Also included are features that help students be more active in learning the material. Each chapter has a set of review questions or case scenarios that can be used as homework, as probe questions in class, or as a basis for group activities. In addition, the author provides lists of supplemental readings from the research literature in the field. The third edition benefits instructors and students alike with the addition of a companion website. The website provides convenient presentation slides for each chapter and answers to review questions for instructors. For students, the website lists the key words for each chapter, provides links to supplemental websites and documents, and displays interactive versions of many of the figures within the text. Other changes to the third edition include: Incorporating the recent information on evidence based practice. Updating the statistics chapter with additional contemporary procedures. Revising the chapter on research design.

About the Author Lauren K. Nelson, PhD, is an associate professor and head of the Department of Communication Sciences and Disorders at the University of Northern Iowa (UNI). Since coming to UNI in 1990 she has taught courses in articulation and phonological disorders, child language disorders, phonetics, prevention of communication disorders, and research methods. Her educational background includes a Bachelor of Science degree from Northern Michigan University and a Master of Arts from Central Michigan University. After working for two years in an Iowa area education agency, she returned to school and completed her PhD studies at Memphis State University (now University of Memphis). Dr. Nelson's current research and scholarly interests focus on application of speech and language production models in assessment and treatment and evidence-based approaches to improve instruction and learning. She has published articles in several professional journals including the *Journal of Applied Psycholinguistics*, *Journal of Speech and Hearing Disorders*, *Journal of Speech and Hearing Research*, *Seminars in Speech and Language*, and *Topics in Language Disorders*. She also has presented research papers and seminars at numerous state and national conferences.
