Deborah L. Walker, David. N. Gans : Rightsizing: Appropriate Staffing for Your Medical Practice before purchasing it in order to gage whether or not it would be worth my time, and all praised Rightsizing: Appropriate Staffing for Your Medical Practice:

1 of 1 people found the following review helpful. Very Helpful for BenchmarkingBy R.C.This book has been extremely helpful in helping to identify the FTE's proven for best practices, and also helping to determine what category those FTE's should be in, i.e. clinical, administrative, clerical, etc. This book will be plenty worn down by me in the coming months as I continue to refer to it and use it. It divides the staffing up by different specialties-hospital-owned versus private, etc.

Based on MGMA benchmarking data, these guidelines will help you rightsize your practice to gain maximum productivity and performance. This book offers a five-step process to benchmark current staffing and analyze your

practice needs.
