**Beverly Leipert, Belinda Leach, Wilfreda Thurston : Rural Women's Health** before purchasing it in order to gage whether or not it would be worth my time, and all praised Rural Women's Health:

The well-being of rural communities affects the well-being of those who reside in towns and cities because of rural-urban connections through food, drinking water, infectious disease, extreme environmental events, recreation, and for many, retirement residence. In rural areas themselves, women play a critical role in the health of their families and

communities, yet women's health is often marginalized or ignored. There have been limited studies to date about rural women and health in Canada. Filling an important gap in scholarship, this collection identifies priority issues that must be addressed to ensure these women's well-being and offers innovative theoretical and methodological ideas for improvement. *Rural Women's Health* integrates perspectives from rural practitioners, residents, and scholars in a variety of fields, including nursing, sociology, anthropology, and geography, to tackle issues relevant to diverse settings across the country. As such, it presents a national perspective on the nature of women's health while respecting internal and regional diversity, as well as viewpoints from international scholarship.

This volume is a rare and important collection of ground-breaking work on a topic too often ignored in Canadian academia. (Megan J. Davis *BC Studies* vol 185 spring 2015) About the Author Beverly D. Leipert is an associate professor in the Arthur Labatt Family School of Nursing at the University of Western Ontario. Belinda Leach is a professor and associate dean (research) in the College of Social and Applied Human Sciences at the University of Guelph. Wilfreda E. Thurston is a professor in the Faculty of Medicine and the Faculty of Veterinary Medicine at the University of Calgary.
