A treasure of practice management secretsBy Dr. Yuval LirovPractice management is more difficult than other kinds of services because of higher risks, higher expectations, and an adversarial payment environment. Yet very few physicians graduate from medical school with adequate knowledge and management skills to face such tremendous challenges. The fledgling practice owner painfully

discovers that attracting patients, managing staff, handling technology, maintaining compliance, and most importantly, getting paid in full and on time, are challenges that require professional approach. If you don't have the time for an MBA program and you don't have access to trustworthy consultants or reliable outsourced service providers, then this book is for you. Every one of its twelve chapters culminates with a list of secrets that Judy Capko discovered and logged during her 20-year career as a practice management consultant. She covers everything from how to manage phone calls to staying on schedule; from meeting patient demands to improving patient satisfaction; and from risk management to taking charge of the revenue cycle and improving practice finances. Capko's book is a real treasure of carefully selected and very well articulated practice management secrets.
